BASIS FOR REJECTIONS

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

REJECTION OF CLAIMS OVER PRIOR ART

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toepperwien (5,007,329) in view of Voissem (2,988,032). Toepperwien illustrates in Figure 2 a diaphragm backing plate 3 for a brake booster having an outer periphery and an inner periphery rolled so that the peripheries are curled. Toepperwien recognizes that these backing plates are manufactured so as to take into consideration weight (see column 1, lines 25-29). Thus, Toepperwien recognizes that less material is needed to manufacture the product. Voissem also manufactures a plate by forming a flange on the inner and outer periphery of the plate such that in effect the flanges are "roller" relative to the sidewalls of the workpiece. Voissem initially manufactures the workpiece from sheet material as shown in Figures 4 and 5 where less material is needed resulting in a weight reduction. It would have been obvious to the skilled artisan at the time of the invention to have modified Toepperwien's process by further using the concepts taught within Voissem teaching. See column 1, lines 10-11 and lines 25-28 where this results in a product that is flattened about the circumference in areas that are unnecessary but ultimately allow for weight savings and the use of less material.

WITHDRAWAL OF NONELECTED CLAIMS

Claim 6 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on January 3, 2006.

PRIOR ART CITED BY EXAMINER

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

RESPONSE BY APPLICANT(S)

Applicant(s) response to be fully responsive and to provide for a clear record must specifically point out how the language of the claims patentably distinguishes them from the references, both those references applied in the objections and rejections and those references cited in view of the state of the art in accordance with 37 CFR 1.111 (a), (b) and (c).
